iRide RACING

eni i-Ride Racing Tec 5W-40

A synthetic lubricant formulated with Polyalphaolefin (PAO), which ensures hard-wearing protection and durability. Meets API SN and JASO MA, MA2.

Product Code: E0288

eni i-Ride Racing Tec 10W-60

A fully synthetic lubricant that provides outstanding racing performance for on-road high-performance 4-stroke motorcycles. The special synthetic formulation, including Polyalphaolefins (PAO), provides excellent resistance to high operating temperatures and excellent product stability. Meets API SN and JASO MA, MA2.

Product Code: E0018

eni i-Ride Racing OffRoad Tec 10W-50

An innovative top synthetic formula developed to meet the lubrication requirements of the latest modern 4-stroke off-road motorcycle engines and clutches. eni's proprietary formula ensures top performance in extreme off-road riding conditions under maximum stresses. Meets API SN and JASO MA, MA2.

Product Code: E0318

iRide MOTO 4T

eni i-Ride Moto 4T Tec 10W-30

A fully synthetic lubricant offering high protection in all operating conditions. Formulated to reduce mechanical and thermal stresses on the engine minimising the formation of lacquer, varnish, sludge and other engine deposits. Meets API SN and JASO MA, MA2.

Product Code: E0289

eni i-Ride Moto 4T Tec 10W-40

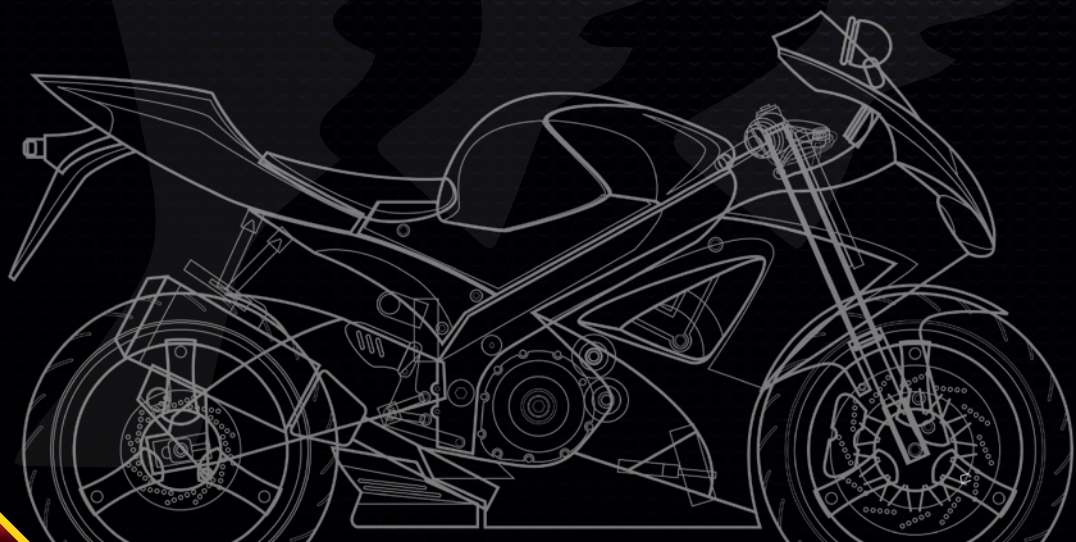

A fully synthetic lubricant that maintains its viscosity, lubricity and detergency in a wide range of operating conditions, minimising the formation of unwanted engine deposits while providing excellent wear protection for all engine components. Meets API SN and JASO MA, MA2.

Product Code: E0292

eni i-Ride Moto 4T Tec 10W-50

A fully synthetic lubricant formulated to withstand the stresses of the latest multi-valve 4-stroke motorcycle engines. Provides optimum performance for both long highway rides and stop and go urban traffic delivering maximum protection and engine life while optimising clutch and gear performance. Meets API SN and JASO MA, MA2.

Product Code: E0019

iRide MOTO 2T

eni i-Ride Moto 2T Extreme Tec 2-Stroke Oil

A fully synthetic lubricant specifically developed for the extreme demands of high revving 2-stroke motorcycle engines. Keeps engines clean preventing ring sticking, piston deposits, plug fouling and exhaust deposits. Suitable for oil injection and pre-mix systems. Meets API SN and JASO MA, MA2.

Product Code: E0224

iRide TOURING

eni i-Ride Touring 4T 15W-50

A synthetic lubricant formulated with high quality base oils designed for motorcycles that travel long distances. Meets API SN and JASO MA, MA2.

Product Code: E0294

iRide SUPER

eni i-Ride Super 4T 20W-50

A mineral based lubricant that retains a film of oil on engine components for optimum gear protection and consistent clutch friction. Meets API SN and JASO MA, MA2.

Product Code: E0022

iRide SCOOTER

eni i-Ride Top Scooter MB 10W-30

A synthetic lubricant expressly formulated to meet the requirements of scooters with automatic transmissions. Delivers superior performance in start-stop conditions experienced by urban scooter engines. Meets API SN and JASO MB.

Product Code: E0291

For best results, always check the motorcycle manufacturer's oil specification and recommendation for your bike before selecting your eni oil.

Our most popular pack sizes include:

1L, 4L, 20L & 205L

Ask your local representative about availability.

eni FORK OIL

eni Fork Oil 5W / 10W

Designed and developed for use in forks and shock absorbers, eni fork oils are corrosion resistant with anti-wear properties and a high viscosity index that allows for a low sliding point resulting in smoother and more uniform suspension action under a wide range of operating conditions. Suitable for both road and off-road use.

Product Codes: 1425 / 1427

eni BRAKE FLUID

eni Brake Fluid Dot 4

DOT 4 is a high-performance glycol based synthetic fluid with a dry boiling point of 260°C that provides consistent and safe brake performance under severe operating conditions. Meets SAE J 1704, FMVSS 116 DOT 4 and ISO 4925/05 (CLASS 04).

Product Code: 1655

eni Brake Fluid Dot 4 Plus

DOT 4 Plus is a high-performance glycol based synthetic fluid with a dry boiling point of 295°C that provides consistent reliable brake performance under the most extreme operating conditions. Meets SAE J 1704, FMVSS 116 DOT 4+ and ISO 4925/05 (CLASS 04).

Product Code: 1652

eni Brake Fluid Dot 5.1

DOT 5.1 is a low viscosity glycol based synthetic fluid with a dry boiling point of 263°C that is ideal for use in braking systems that experience the high temperatures generated by prolonged severe braking. Meets SAE J 1703, FMVSS 116 DOT 5.1 and ISO 4925/05 (CLASS 05).

Product Code: 7445

eni COOLANT

eni Antifreeze Bike S

Based on ethylene glycol, eni Antifreeze Bike S has superior heat dissipation characteristics providing a stable operating temperature in harsh operating conditions. Formulated to protect against the corrosion of all engine and radiator parts including those made of cast iron, aluminium and copper as well as hoses, seals and plastics. Meets CUNA NC 956-16 (ed. '12), ASTM D 3306, AFNOR NFR 15-601 and JIS K 2234:2006.

Product Code: 1619

eni CHAIN LUBE

eni Chain Lube Spray

eni Chain Lube is a synthetic adhesive and anti-stick lubricant for motorcycle chains. Recommended for all types of chains, including chains with O-ring seals. Handy 400ml spray can.

Product Code: 9892
